Open stage CUT & STYLING

During this training session, you will discover how DESSANGE thinks about cuts, constructing them from the techniques of the templates. For every type and style of hair, the mastery of DESSANGE cutting techniques provides the expertise necessary for imagining all the possible solutions.

DESSANGE hair stylists use innovative brand-specific techniques that are taught exclusively in its training centers. They are inspired by the world of Couture: the head is considered in its entirety, as a three-dimensional object. The expertise of the consultation and the unique skill of the structuring of DESSANGE cuts give hair that sits perfectly. Then, the woman can easily and quickly style her own hair.

That is the very essence of the famous "coiffé-decoiffé" look (i.e. bed head hair), set in the brand's history. There's a new take on it every season and it's carried out in total perfection, only in DESSANGE salons.

THE COLOR WORKSHOP

During this training session, you will discover an original color approach, which adapts to all styles and types of hair. DESSANGE and its array of specific application techniques provide a unique color every time, created from the masterful interplay of shadow and light.

The technical expertise for color is a completely separate profession. The DESSANGE house clearly understood this, becoming the first to create the profession of colorist. The inimitable DESSANGE Californian blond, which made its first appearance in 1982 with a new take for every collection, is the undisputed symbol of this unrivaled expertise. The coloring techniques are exclusive: hand-painted balayage, color customization, unique sheen...

Like a painter with his canvas, the colorist places the color according to the cut and the feeling inspired in them by the hair's movement. Every color, like every woman, is unique.
